Property Internals

High Level's mast system is ideal for getting up "close and personal" with roofs!

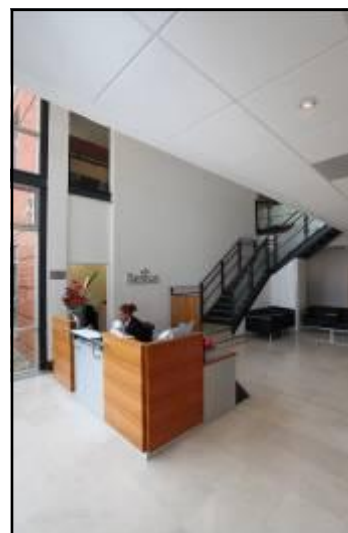

We have the ability to zoom in to areas of particular interest to provide highly specialised images for review, inspection and survey requirements.

From a health and safety point of view, our system negates the need for the surveyor to risk "life and limb" to access the roof area for a visual inspection first hand.

High Level were commissioned to take some images of an investment property in Hampshire. Mast, ground external and internal shots were required reflecting the buildings internal space and context within local area. Above are a selection of the images.

Another High Level commission was to take images of a large mixed use site in Kent. A large number of images were supplied showing business, leisure and residential units on the site from a combination of mast and ground externals and internals. Above are a small selection of the images provided to our client.

High Level's MD Ian Leslie on board a cherry picker at a development site near Canary Wharf, London.

Camera mounted UAV deployed to take images of development site to height of 27th floor.

Mast fully extended on High Level's vehicle La Manga, Spain.

Cherry picker assignment for development site near the old Battersea Power Station, London. Height achieved 200ft.

High Level's various of mast mounted vehicles in-action

High Level in Action

Easter Thunderball 2009 at Santapod Raceway, High Level provided both stills and video imagery from our mast vehicles of the action. Subsequently used by a production company for DVD and programme shown on Sky Sports 3.

Olympic rings formed by 400 schoolchildren in their house colours. Buckinghamshire. July 2010

In April 2009 High Level covered the funeral of Jade Goody's funeral. Sky News utilised one of our video camera mast mounted vehicles for a live feed aerial view of the church (above). In addition to mast video and stills High Level also provided ground shots of the event. The photo at left appeared as a full page in the following days News of the World.

April 2009 High Level covered the start of the London Marathon at Blackheath both from the mast and ground shots. Various images were subsequently published in the UK press.

High Level supply Synergy Aviation with images of their aircraft fleet for their website
